

First you have to create a new data base.

```
mysql> CREATE DATABASE empresa_db;  
Query OK, 1 row affected (0.00 sec)
```

```
mysql> USE empresa_db;  
Database changed
```

```
mysql> USE empresa_db;  
Database changed  
mysql> CREATE TABLE departamentos (  
  ->   id INT PRIMARY KEY,  
  ->   nombre VARCHAR(50),  
  ->   ubicacion VARCHAR(100)  
  -> );  
Query OK, 0 rows affected (0.02 sec)
```

```
mysql>  
mysql> CREATE TABLE EMPLEADOS (  
  ->   id INT PRIMARY KEY,  
  ->   nombre VARCHAR(50),  
  ->   apellido VARCHAR(50),  
  ->   departamento_id INT,  
  ->   FOREIGN KEY (departamento_id) REFERENCES departamentos(id)  
  -> );  
Query OK, 0 rows affected (0.00 sec)
```

```
mysql> INSERT INTO departamentos (id, nombre, ubicacion) VALUES  
  -> (1, 'Ventas', 'Madrid'),  
  -> (2, 'Desarrollo', 'Barcelona');  
Query OK, 2 rows affected (0.00 sec)  
Records: 2  Duplicates: 0  Warnings: 0
```

```
mysql>  
mysql> INSERT INTO EMPLEADOS (id, nombre, apellido, departamento_id) VALUES  
  -> (1, 'Juan', 'Pérez', 1),  
  -> (2, 'Ana', 'Gómez', 2);  
Query OK, 2 rows affected (0.00 sec)  
Records: 2  Duplicates: 0  Warnings: 0
```

The screenshot shows the IntelliJ IDEA IDE with a project named "Project_files". The "src" folder contains several files, including "JDBCExample.java". The code in "JDBCExample.java" is as follows:

```
1 import java.sql.Connection;
2 import java.sql.DriverManager;
3 import java.sql.ResultSet;
4 import java.sql.Statement;
5
6 public class JDBCExample {
7     public static void main(String[] args) {
8         String url = "jdbc:mysql://localhost:3306/empresa_db";
9         String user = "root";
10        String password = "Primer2024";
11
12        try {
13            Connection conn = DriverManager.getConnection(url, user, password);
14            Statement stat = conn.createStatement();
15            ResultSet rs = stat.executeQuery("SELECT * FROM departamentos");
16
17            while (rs.next()) {
18                int id = rs.getInt("id");
19                String nombre = rs.getString("nombre");
20                String ubicacion = rs.getString("ubicacion");
21
22                System.out.println("ID: " + id + ", Nombre: " + nombre + ", Ubicación: " + ubicacion);
23            }
24
25            rs.close();
26            stat.close();
27            conn.close();
28        } catch (Exception e) {
29            e.printStackTrace();
30        }
31    }
32}
```

The Run window shows the output of the program:

```
ID: 1, Nombre: Ventas, Ubicación: Madrid
ID: 2, Nombre: Desarrollo, Ubicación: Barcelona
Process finished with exit code 0
```

The screenshot shows the IntelliJ IDEA IDE with the same project "Project_files". The "JDBCExample.java" file is open, and the code is as follows:

```
1 import java.sql.Connection;
2 import java.sql.DriverManager;
3 import java.sql.ResultSet;
4 import java.sql.Statement;
5
6 public class JDBCExample {
7     public static void main(String[] args) {
8         String url = "jdbc:mysql://localhost:3306/empresa_db";
9         String user = "root";
10        String password = "Primer2024";
11
12        try {
13            Connection conn = DriverManager.getConnection(url, user, password);
14            Statement stat = conn.createStatement();
15            ResultSet rs = stat.executeQuery("SELECT * FROM departamentos");
16
17            int rowCount = 0;
18            while (rs.next()) {
19                rowCount++;
20                int id = rs.getInt("id");
21                String nombre = rs.getString("nombre");
22                String ubicacion = rs.getString("ubicacion");
23
24                System.out.println("Fila #" + rowCount + ": ID: " + id + ", Nombre: " + nombre + ", Ubicación: " + ubicacion);
25            }
26
27            System.out.println("Total de filas recuperadas: " + rowCount);
28
29            rs.close();
30            stat.close();
31            conn.close();
32        }
33    }
34}
```

The Run window shows the output of the program:

```
Fila #1: ID: 1, Nombre: Ventas, Ubicación: Madrid
Fila #2: ID: 2, Nombre: Desarrollo, Ubicación: Barcelona
Total de filas recuperadas: 2
Process finished with exit code 0
```
